

Process Manufacturing Industry

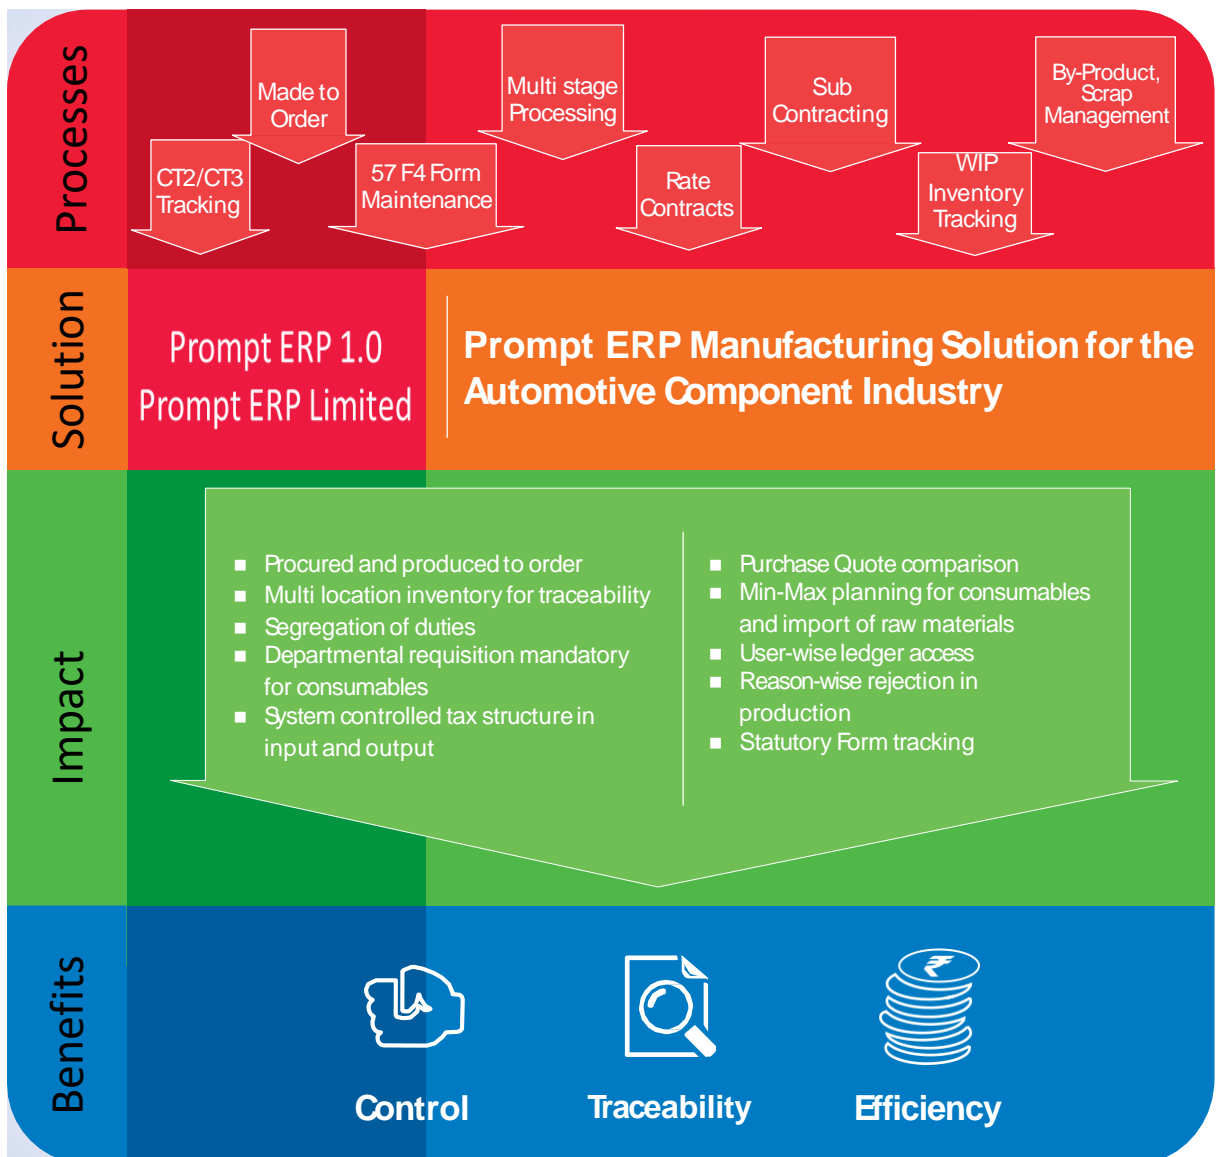

Prompt ERP for Process Manufacturing Industry

Current challenges in the automotive component industry include the need for faster turnaround times and Just In Time (JIT) delivery. The industry is witnessing a paradigm shift to a buyer's market – time-bound orders tend to carry no limitations on quantity and manufacturers operate at thin margins and high volumes. Operational efficiencies are essential to stay competitive in this scenario. Additionally, export markets demand global standards of quality and on-time delivery.

Towards this, we at PROMPTERPLIMITED offer the iON Manufacturing Solution for the Automotive Component Industry, an innovative solution that automates your Production Planning and Control (PPC) process. Our solution integrates all the functions of your organization, allowing you to deliver at a globally competitive level by enabling better inventory management and JIT delivery. Additionally, it helps you reduce costs by enabling faster and leaner production, and also simplifies and automates your billing process.

Prompt ERP Manufacturing Solution for the Automotive Component Industry

Prompt ERP Manufacturing Solution for the Automotive Component Industry brings you a rich set of features to streamline your business:

Feature	Benefit
Material Requirements Planning (MRP)	Plan production and procurement of raw materials as per the sales orders received
Automated Production Planning and Control (PPC)	Automatically schedule production jobs
Inventory location management	Create and manage different inventory locations to keep track of inventory movement within the organization
Segregation of duties	Define workflows for critical processes to assign responsibilities and minimize the possibility of errors
Departmental requisition	Improve control over the consumption pattern for items that were previously unaccounted for by mandating a requisition for any material issued for consumption
System controlled tax structure	Eliminate clerical errors caused by ignorance of statutory requirements through automated application of taxes based on user-defined conditions
Comparison of purchase quote	Identify the L1 (lowest cost) supplier and reduce procurement cost
Min-Max planning for consumables and imported raw materials	Control inventory and reduce costs with Min-Max planning for consumables and imported raw materials that have a high procurement lead time
User-wise ledger access	Restrict access to sensitive information in the accounts department to authorized users only
Reports on reasons for rejection in production	Take preventive action by drilling down to the cause of rejections on the production floor
On-demand reports	Generate and view reports whenever you need them, even from your smart phone
Statutory form tracking	Achieve statutory compliance and minimize legal complications by tracking statutory forms
Extranet integration with OEMs	Upload invoice details directly to OEMs and simplify your billing process
Integration of finance vouchers with bank statements and 'hundi' statements via auto-bank reconciliation	Automate accounting processes
Upload of large volumes of transactions through Microsoft® Excel™	Integrate your current processes easily with our ERP module
Auto-transfer policies for stock movements	Manage multi-site production easily
In-process quality controls for Goods Inward Note (GIN), production, finished goods; re-test during shipment	Improve product quality

PROMPT ERP LIMITED

Think Smart

About PROMPT ERP

PROMPT ERP is a strategic unit of PROMPT ERP LIMITED focused on Small and Medium Businesses. We provide technology by means of a unique IT-as-a-Service model, offering end-to-end business solutions for the sector.

PROMPT ERP caters to the needs of multiple industry segments, through innovative, easy-to-use, secured, integrated, hosted solutions in a build-as-you-grow, pay-as-you-use business model. We serve our clients with the help of best practices gained through PROMPT's global experience, domestic market reach, skills, and delivery capabilities.
